Subject description

Year 7 and 8 students are following the Mastery Mathematics approach to teaching. The intention behind using the Mastery Mathematics approach is to provide all children with full access to the curriculum, enabling them to achieve fluency in mathematics and close any gaps in knowledge or understanding. The focus is on deepening understanding, thereby equipping students to adapt and apply their Mathematics in a range of contexts and problem solving activities.

Topics that will be discussed within the subject at this Key Stage

The scheme of learning covers the four main strands of Mathematics: Number, Algebra, Shape and Space and Data, and ensures continuity and supports students' transition from Primary to Secondary Mathematics.

Grading System

Students' progress will be assessed relative to their starting point. We will indicate whether students are below, working towards, making, above or exceeding expected progress. This will be based on a mixture of assessments and class work assessed against our own internal 'progress ladders'

'Together we achieve'
